

NERVA ? governed request intelligence for enterprise operations

Generated 2026-08-10T23:07:28.298Z

Executive metrics

Readiness [#####-] 91%
Acceptance [#-----] 10%
Simulation [#####] 95%
Scenarios 23 ? tenants 6

Problem

Employees express intent in chat, email, and tickets; operators waste cycles routing work across siloed systems.

Solution

NERVA normalizes requests, reasons over an ownership graph, keeps humans in the loop, and leaves an audit-grade trail.

Traction

6 demo tenant(s) at 91% average readiness with 23 automated pilot scenarios.

Differentiation

Constitutional cognitive kernel (NCL, NCOM, NCCM), multi-tenant RBAC, OTel observability, and procurement-ready evidence exports.

Pilot ask

Run the pilot pack live with your Teams/Slack/Email connectors, export the procurement ZIP, and review Grafana + audit bundles.

Demo tenant metrics

Tenant | Ready | Accept | Sim pass | ROI

adventureworks-regulated-health | 94% | 0% | 100% | 0m
contoso-federation-lab | 82% | 0% | 100% | 0m
fabrikam-dr-eu | 94% | 0% | 100% | 0m
goldspire-demo-enterprise | 88% | 40% | 70% | 6076m
litware-sovereign-lab | 94% | 0% | 100% | 0m
northwind-demo-pilot | 94% | 20% | 100% | 20m
